

PB 532

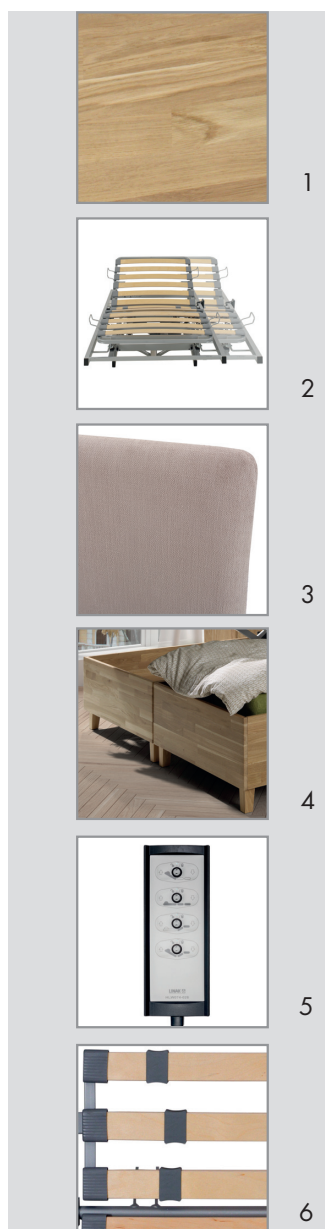

The PB 532 bed with static mattress platform PB 521 is a unique proposal from Elbur, combining a homely character with the full functionality of a long-term care bed. The possibility of combining two beds together facilitates direct contact and support for the person in need of care. The use of solid oak and an upholstered soft headboard ensure that the bedroom does not lose its unique character.

In the picture: two PB 532 oak enclosures with PB 521 static mattress platforms. Accessories: Rubens 3 table in light oak.

PB 532
